

# UJJWAL AGARWAL

DevOps & Cloud Engineering

+91 9982090853 · iamujjwalagarwal99@gmail.com · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

## PROFESSIONAL SUMMARY

DevOps & Cloud Engineering fresher (B.Tech CSE, CGPA 9.21) with hands-on experience across two internships and two self-built cloud-native projects spanning AWS, Kubernetes, Terraform, GitOps, and CI/CD. Comfortable working across the full delivery lifecycle — provisioning infrastructure as code, orchestrating containerized workloads, and building observability into deployments — rather than individual tools in isolation. Seeking a DevOps / Cloud internship or entry-level role to apply this foundation on a real engineering team.

## TECHNICAL SKILLS

**Cloud:** AWS — EC2, IAM, S3, VPC, RDS, ECR, CloudWatch

**Containers & Orchestration:** Docker, Kubernetes, Helm

**Infrastructure as Code:** Terraform, Ansible

**CI/CD & GitOps:** Jenkins, GitHub Actions, GitLab, Argo CD

**Monitoring & Observability:** Prometheus, Grafana, Loki

**OS, Scripting & Networking:** Linux, Bash, Git, DNS/TCP/HTTP, Load Balancing vs. Ingress

**Programming:** Python

## PROJECTS

### OpsBoard — Cloud-Native DevOps Platform on Amazon EKS

[Repository](#)

*AWS · Amazon EKS · Terraform · Docker · Kubernetes · Helm · GitHub Actions · Argo CD · Prometheus · Grafana · Loki*

- Provisioned AWS networking and IAM foundations (VPC, subnets, IAM roles) for an Amazon EKS cluster entirely through Terraform, replacing manual console setup with version-controlled infrastructure.
- Implemented GitOps continuous delivery with Argo CD, syncing Kubernetes Deployments, Services, Ingress, ConfigMaps, and Secrets automatically from Git.
- Automated CI validation and image builds with GitHub Actions, packaging the application as immutable Docker images deployed via Helm charts.
- Built a full observability stack — Prometheus for metrics, Grafana for dashboards, Loki for centralized logs — across namespace-isolated workloads behind an AWS Application Load Balancer.

### Enterprise Employee Management System — Production-Style AWS Deployment

[Repository](#)

*React · FastAPI · MySQL · Docker · Terraform · Ansible · Jenkins · Amazon ECR · AWS (EC2, ALB, ASG, RDS, CloudWatch)*

- Provisioned a three-tier AWS architecture (EC2, Application Load Balancer, Auto Scaling Group, Amazon RDS) entirely through Terraform, including VPC, IAM, ECR, and CloudWatch resources.
- Automated server configuration with Ansible and built a Jenkins CI/CD pipeline to build Docker images, publish to Amazon ECR, and deploy to production without manual steps.
- Configured Nginx as a reverse proxy in front of a React frontend and FastAPI backend, with MySQL on Amazon RDS as the data layer.
- Integrated Amazon CloudWatch for infrastructure monitoring and operational visibility across the deployment.

## EXPERIENCE

### DevOps Intern — LinuxWorld Informatics Pvt. Ltd.

*May 2026 – June 2026*

- Automated cloud infrastructure provisioning using Terraform and Ansible on AWS, applying Infrastructure-as-Code principles in place of manual console configuration.
- Integrated Docker, Kubernetes, and Jenkins into containerized deployment workflows — the same GitOps and CI/CD practices later applied to build OpsBoard.
- Wrote Bash automation scripts to standardize deployment steps and reduce manual operational effort across environments.
- Applied core Linux fundamentals (shell scripting, file permissions, process and log management) and networking concepts (DNS, TCP/HTTP, load balancing vs. Ingress) in daily infrastructure work.

### Cloud Computing Intern — Corizo Edutech

*Nov 2025 – Jan 2026*

- Provisioned and managed core AWS resources (EC2, IAM, S3) to build hands-on experience with compute, storage, and networking fundamentals.
- Practiced Linux system administration and virtualization in lab environments, reinforcing cloud architecture fundamentals ahead of the AWS-specialized DevOps internship that followed.
- Explored cloud security and networking concepts underlying scalable, production-grade AWS deployments.

## EDUCATION

### Bachelor of Technology — Computer Science & Engineering

*2023 – 2027*

Pratap Institute of Technology & Science, Sikar (affiliated to Bikaner Technical University) · CGPA: 9.21

## CERTIFICATIONS

Cloud Computing Internship & Cloud Computing Trainee — Corizo Edutech Private Limited

Specialisation in DevOps with AWS Cloud Internship — Linux World Private Limited
